12 RESPONSIBLE CONSUMPTION AND PRODUCTION
13 CLIMATE ACTION
14 LIFE BELOW WATER
15 LIFE ON LAND
16 PEACE, JUSTICE AND STRONG INSTITUTIONS
17 PARTNERSHIPS FOR THE GOALS

SUSTAINABLE DEVELOPMENT GOALS

Fundamental Principle

Our fundamental principle is to foster human talent capable of contributing to the achievement of harmonious coexistence of people, society and nature, in addition to conducting creative academic research.

Objectives

In order to spread knowledge widely, educate and research specialized science deeply, and achieve the harmonious coexistence of people, society and nature, Tottori University of Environmental Studies nurtures people with abundant human qualities, who think and act for themselves, and live their lives powerfully.

Furthermore, we foster human talent who aim to develop a sustainable society while maintaining a local perspective that values the regional natural environment and the connections between people, with an excellent sense of balance capable of global activities spanning both conservation of the natural environment and human economic development; human talent who are connected to and take responsibility for their local region, and can succeed on the world stage.

Come and learn from two perspectives, the environment and business management, and then fly into the future.

President **Tomomichi Kobayashi**

Although this is a small university, it is a unique one. We enroll students from Hokkaido to Okinawa, up and down the length of Japan.

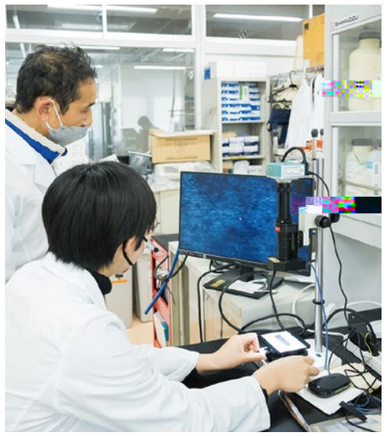
FACULTIES AND GRADUATE SCHOOL

Faculty of Environmental Studies

Learn specialized environmental knowledge and technology, and foster the ability to make proposals and take action for the benefit of society.

Students tackle fieldwork consisting of practical study of the environment, starting from Year 1, and learn about environmental subjects in a wide range of fields, including Environmental Conservation, Establishing a Recycling-oriented society, Human Environment, and more. Students also develop personal abilities that will connect to their futures, such as proactive capabilities and communication skills, and particularly the ability to solve environmental issues for the purpose of harmonious coexistence of people, society and nature. Furthermore, the Faculty has established a teacher-training course (junior and senior high school science), and fosters human talent who can play an active role in the field of school education.



Faculty of Business Administration

Develop the driving force and management ability needed to be active in a diverse business society.

In addition to cultivating fundamental management abilities required for activity in our diverse business society, students master the study of business administration from the perspectives of enterprises, Financial Accounting, local regions, and information. With Tottori Prefecture – where issues that Japan will face ten years from now are already coming to the forefront, such as the problems of decreasing birthrate and aging population – as the stage of learning, the Faculty nurtures students' abilities to make proposals and take action. From the perspective of business administration, we foster human talent who can contribute to the creation of a society that coexists harmoniously with nature.

General Education Center

The objective of the General Education Center is to give an education in the liberal arts. The center provides the following subjects :

- **Foreign languages (English, Chinese, Korean, Russian)**
- **Career design** • **Computer literacy**
- **Natural sciences** • **Social sciences** • **Humanities**

The center also includes the course called Project Research (1~4). This course aims to develop the ability to learn actively, to think actively and to act.

Graduate School

Today, there is a strong demand for environmental studies including a business administration point of view, and business administration studies aware of the environment.

Studies in Environmental Science has three sets of courses added to the Environment Management Courses : Natural Environment Courses, Resource Circulation Courses and Human Environment Courses. These courses train experts with a knowledge of particular areas and also train specialists with a wide vision. Studies in Business Administration has three sets of courses added to the Environment

Student labs are always available for your use.

The school buildings with their exciting tone are virtually always available for discussions and sharing reports with friends.

We are proud of the closeness developed between students and teachers.

Because this is a compact university, profs and students are always accessible to one- another and friendly support is easy to find.

The programs we offer will help you to find desirable jobs.

There are programs that are useful for job hunting. These include project research for both self-study and teamwork approaches, and internships where you can get good experience in a particular field.
